This list is not exhaustive.

If you are interested in an elective/clerkship at a clinic that is not listed, please let us know and we will contact the department(s) to discuss capacity and minimum language requirements.

Research collaborations

We are particular interested in research exchanges that can run independently of the above programs. Research can be preclinical or clinical. Financing of research stays in Magdeburg can be possible depending on the individual situation. We particular encourage to apply for strategic research stays with the common goal to prepare (preliminary) data with the goal for joint scientific publications and grant applications. Any interested person for research exchanges shall contact academic editor Ulf Kahlert using AAA email address.
